

Kelio Analytics

Organising and Analysing
Your Company's Activity

Where does your time at work go?

Kelio Analytics gives you :

- A **simple and reliable** solution to help you organise and monitor your company's and employees' activities,
- A **better view** of the time each department, analytical section or work centre have worked,
- The **indicators** you need to integrate working time into your analytical accounting and optimise your organisation's efficiency.

BODET's additional key features:

- ⊕ **COMPLETE INTEGRATION** with Kelio time management
- ⊕ **SIMPLICITY OF USE**
- ⊕ **EVOLUTION** to cost centre management with Kelio Analytics +

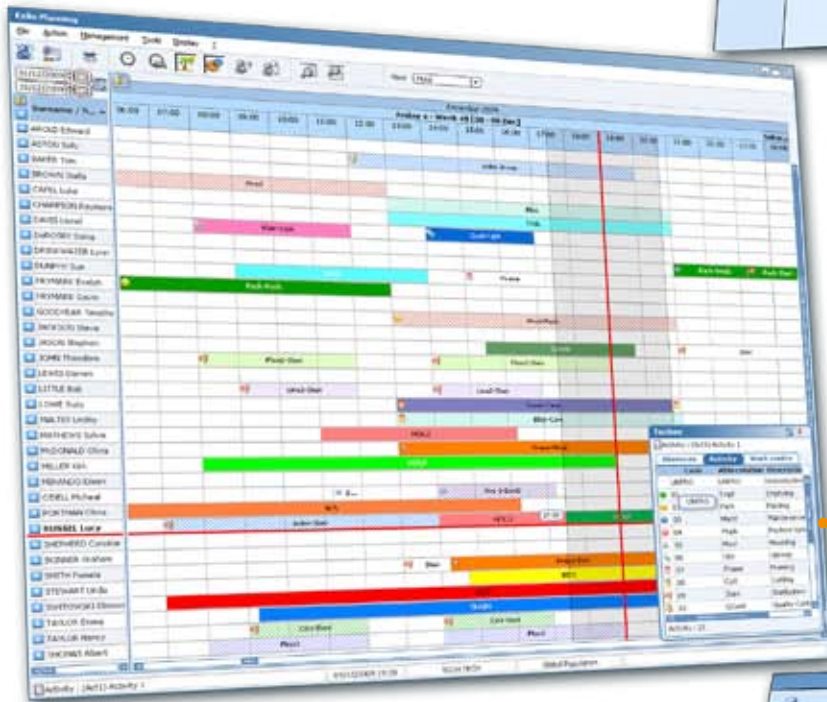

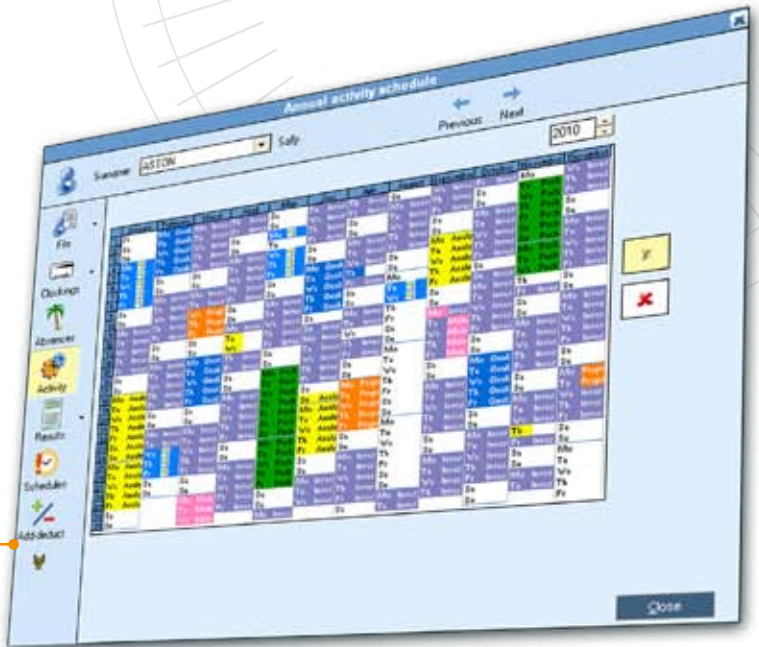

Simple and User-friendly

→ Time management by department

Kelio Analytics lets you allocate your working time to suit your organisational structure. It integrates changes of department and staff loans. You can perform past, present or future adaptation using its individual planning module.

Individual activity planning

Reliable and Efficient

→ Activity planning

When combined with Kelio Planning, Kelio Analytics helps you organise and display the allocations of your employees' activities in simple and clear schedules. Refine your planning by specifying the work centres with Kelio Analytics +.

Collective daily activity planning

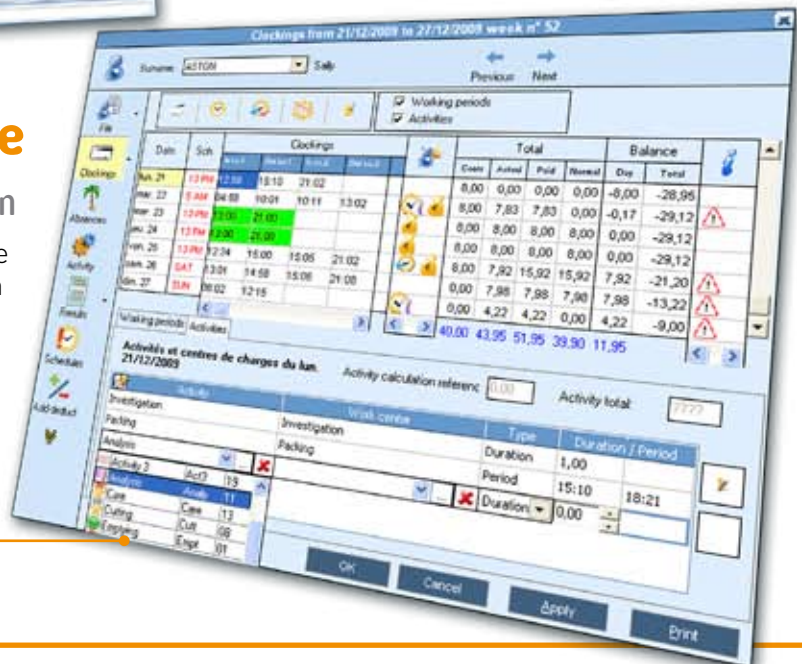

Flexible and Accurate

→ Manual and automatic allocation

An allocation screen lets you calculate automatically the activity time for each employee and alter the time distribution when you need to.

Increase the accuracy of your working time allocation with work centres set up in Kelio Analytics +.

Individual daily activity and work centre allocation
