

Security patrol

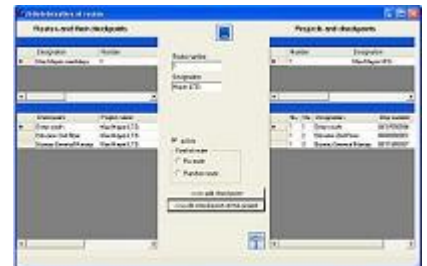

Cogard 3000

Cogard provides technology for the guarding, maintenance and facility management markets.

The Cogard 3000 has been developed with your ease of use in mind. It offers you a straight forward method of keeping track of your security patrols using a weather and dirt resistant collector and proximity chips.

Simply hold the data collector to the chips and an led and acoustic indication show that a successful reading has taken place

Stored data is then transferred from the base station to your PC allowing records of your patrols to be stored, printed or emailed when required.

Features

- Easy to handle data collector.
- Extremely robust– for mobile use and harsh environments.
- Proximity chip checkpoints for safety and security checks.
- 250 checkpoints and 3000 stored bookings.
- Data transfer to base station on to PC via Co Soft software.
- Guard ID checkpoints available
- Connection to PC via USB lead
- Additional handheld and charger units can be added to the same software

Specifications

- Collector dimensions: H177mm x W48.5mm x D36 mm
- Collector Weight: approx. 220g
- Collector splash proof and shockproof
- Collector capacity: 3000 readings,
- Charger for collector
- Power supply: 240 volts
